### Rules for forming teams

Michael Osier posted Jan 22, 2026 10:41 AM

Subscribe

Good morning!

As promised, here are the rules for creating groups:

### clarification on project pick writeup

Michael Osier posted Feb 3, 2026 10:06 AM

Subscribe

Good morning!

We've had a couple questions about the writeup due today, so I'm going to write down

## class closing (delayed ;)

Michael Osier posted Apr 9, 2026 1:04 PM [☆ Subscribe](#)

Good afternoon!

Just a couple final thoughts that the power outage disrupted. :)

## Draft feedback process

Michael Osier posted Apr 9, 2026 5:57 PM [✎](#) [☆ Subscribe](#)

Hi folks,

I've downloaded the most recent submission from each group. I'm going to start going through drafts and giving general suggestions to the group as a whole.

For future drafts, it might be easier if you designate one person from each group to submit the draft for that group...not everyone has to submit something. :)

Also, please be sure to submit in an appropriate format. If it is in PDF, I can't give feedback inline to show you examples. 🙄

Best,

Dr. Osier

## General feedback on drafts

Michael Osier posted Apr 9, 2026 6:21 PM [☆ Subscribe](#)

Good evening!

Adding these in as I find them:

= No abstracts, please. :)

= Be sure to cite all tools used. In fact, if you haven't done so already, you should start gathering citations for your Intro.

= Always good to include a table of samples in M&M with what is known about them.

= Give sample commands for every tool used...we don't normally do it, but this will make your paper more reproducible in the future. Usually we just list any parameters changed from the default for that tool.

= For figures and tables in Results, tell the reader in your prose what is interesting...any outliers? Patterns? Indications of something revealed and/or unexpected? Give hard numbers where you can. If it reveals something factual, report it...if it reveals something you interpret or give an opinion, probably best in Discussion...it's sometimes a grey area, so ask if you have questions.

I'll add more as I encounter them.

Best,

Dr. Osier
